

Day 31 coding Statement : Write a Program to Toggle each character in a string

Description

Get an input string from user and then convert the lower case of alphabets to upper case and all upper-case alphabets into lower case.

Input

Hello

Output

hELLO

Code:

```
str1 = input("Enter a string: ")  
print("Toggled String : ",str1.swapcase())
```

Output:

Enter a string: Hello

Toggled String : hELLO
